

AirSwitch™ Facemask for Magnum & Magnum Plus

Upgrade Your Magnum/Magnum Plus to the 21st Century

Magnum Panaseal Facemask

- Regulator must be manually docked
- Regulator must be disassembled to sanitize
- Un-dock regulator for fresh air
- One size facemask
- Single-curve visor
- "5-tab" - pull backward net head harness
- 5-point head harness
- Standard anti-fog/anti-scratch coating
- "Suction cup" spectacle kit

New ISI Facemask for Magnum

- Integrated regulator always ready - no docking required
- Facemask and integrated regulator completely submersible for quick cleaning/sanitizing/disinfecting
- Switch easily from cylinder air to fresh air - no un-docking required
- 100% optically correct visor
- Choice of three facemask sizes
- Choice of either single or double-curve
- Field-of-view greater than that of the human eye
- New permanent anti-fog/anti-scratch coating
- Low profile facemask and regulator
- 4-point head harness - no helmet interference
- Single-pull (2-tab) net head harness
- New no-slip nose-mount spectacle kit

OPTIONS

The new ISI Airswitch™ Facemask is available on the Magnum and Magnum Plus in two different configurations: with or without the buddy breather option.

If the current configuration of the Magnum is without the buddy breather option, the upgrade kit will include:

- facemask with regulator with a quick disconnect plug
- hose connecting to the pressure reducer
- carrying case

Installing the hose is easy. Simply remove the cover plate on the pressure reducer, remove the u-clip, and remove the old hose and install the new hose. Replace the u-clip, and replace the cover plate.

For Magnum series SCBA with the buddy breather option, a new buddy breather connection is also included. Remove the old buddy breather connection on the left side waistbelt and install the new connection using a liquid Teflon sealer. The new buddy breather connection is not compatible with the existing connector, so it is recommended that all buddy breathers be replaced at the same time.
